

Petrochemical industry

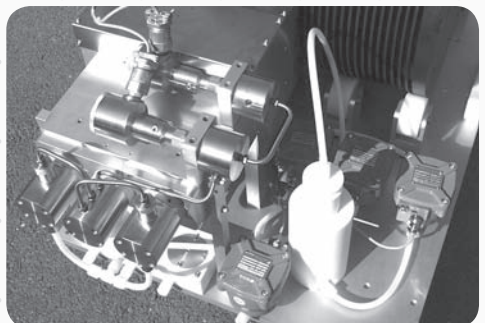

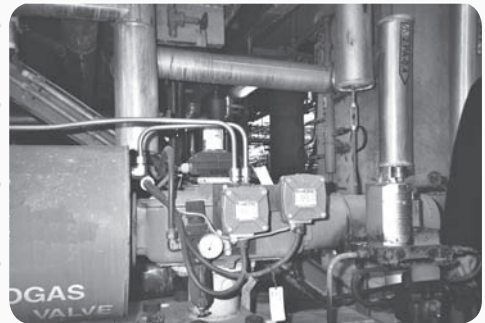

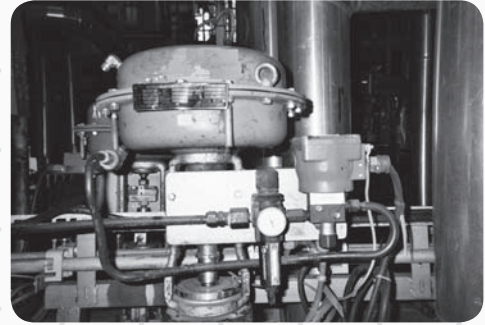

ASCO Numatics is the leader in the design and manufacturing of quality solenoid valves and pneumatic components for automated systems. Today, many customers ask for complete systems and customized solutions.

ASCO Numatics can provide not just the manufacture of your control package, but also "state-of-the-art" knowledge of the complete project from design to delivery.

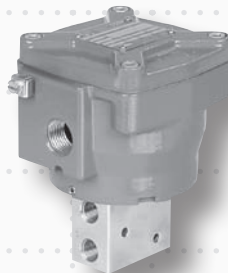

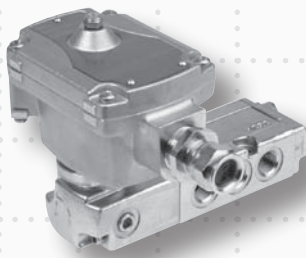

A specialist team

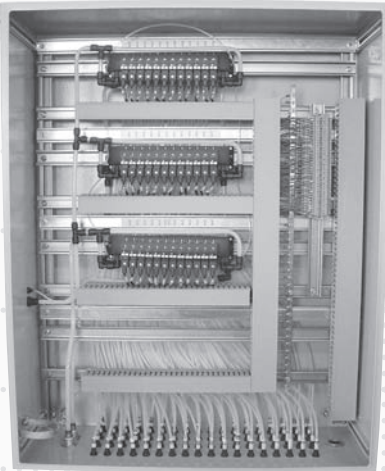

Our team of engineers and technicians evaluate your needs and offer the most effective solutions for your specific automated control system requirements.

These completely customized assemblies provide a solution for your application and reduce your cost of ownership.

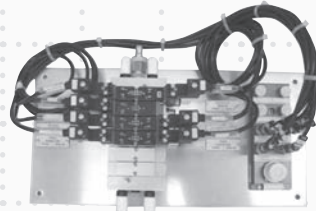

Pumping station for HPLC chromatograph that can be used in explosive areas

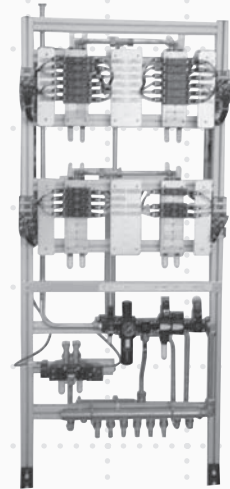

Mega valve islands in cabinet

Assembly machine

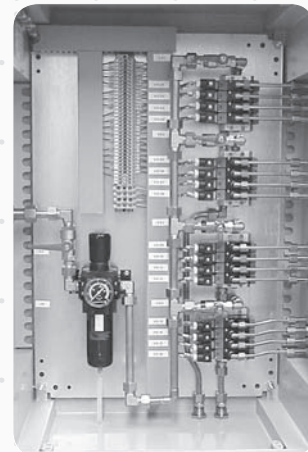

Components mounted on an aluminium frame

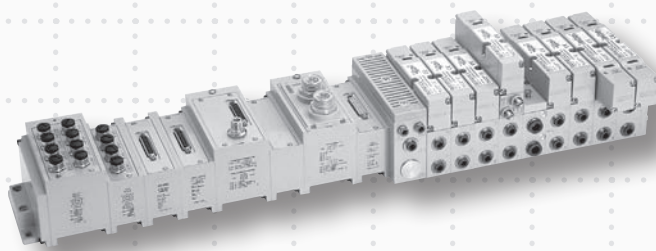

Pilot valve cabinets for remote control

ASCO Numatics offers customized cabinets and supplies "Turn-key" systems that will limit your inventory and will considerably reduce your engineering and installation cost.

Your system design will benefit from our technical know-how and capabilities. We have the flexibility to build virtually any size and quantity.

Water treatment industry

Control of pressure operated valves in battery recycling unit
